1 This is a main heading 3

 1.1 this is a sub heading 3

 1.1.1 this is a theorem 3

2 test 3

Theorem 0.1 (Python)

this is a test. I don't know if this is good or not.

1 This is a main heading

Theorem 1.1 (Python)

this is a test. I don't know if this is good or not.

1.1 this is a sub heading

1.1.1 this is a theorem

Theorem 1.2 (Python)

this is a test. I don't know if this is good or not.

2 test

Theorem 2.1 (Python)

this is a test. I don't know if this is good or not.

Theorem 2.2 (Python)

this is a test. I don't know if this is good or not.

Theorem 2.3 (Python)

this is a test. I don't know if this is good or not.

Theorem 2.4 (Python)

this is a test. I don't know if this is good or not.

Proof 2.1 (test)

this is a test. I don't know if this is good or not.

Lemma 2.1 (another proof)

hello.

```
for(int i = 0; i < 23; ++i){  
  x = 23 + 5  
}
```

Lemma 2.2 (test)

this is a test on lypst

2.1 (Hello this is going to be really quite long now.)

test among

test

This is bad!

This is quite interesting. In fact this is $i \bmod 3 = 2, x - 2 + 3 \parallel 3 \mid 3$

$$\int_3^4 f(x) \frac{dy}{dx}$$
